

**MASTER CLASS  
IN IMPLANT THERAPY 2024-25**

# **SIV IMPLANTS IN THE AESTHETIC ZONE**

19-20-21 JUNE 2025

**36 CONTINUING  
EDUCATION UNITS**

**12 HOURS LECTURES**

**12 HOURS HANDS-ON**

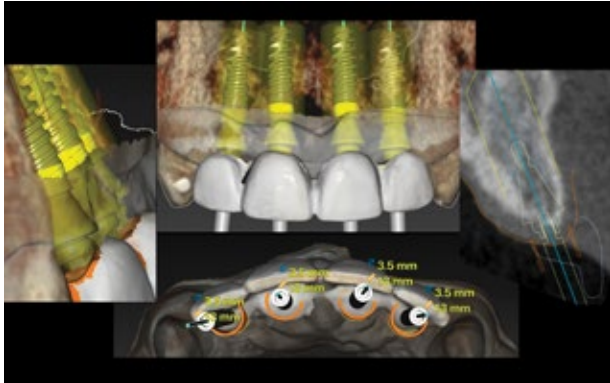

**FORMATIONDMD.CA**

**CONTENTS :**

- Biology and physiology of alveolar healing
- Alveolar ridge preservation techniques in the aesthetic area
- Virtual surgical planning and guided surgery in the aesthetic zone
- Soft tissue management, flap techniques and sutures
- Principles, techniques and uses of connective tissue grafting
- Coronally advanced flap, tunneling, palatal flap
- Immediate and delayed implant placement
- Essential success criteria for predictable long-term results, from a surgical and prosthetic point of view
- Advantages and techniques of temporization in the aesthetic zone
- Prosthetic contour design and soft tissue management
- Final restoration design and delivery
- Dental materials advances and their implications in implant dentistry

**HANDS-ON TRAINING :**

- Guided surgery planning for the aesthetic zone
- Flap techniques, connective tissue grafting and sutures
- Temporization technique, impressions and prosthetic phase
- Live surgery

Implant placement for tooth replacement in the aesthetic area remains a huge challenge in our practice. The clinician must consider a wide range of different concepts and approaches, not to mention the controversy and disagreement in the literature surrounding the overabundance of different hard and soft tissue replacement materials, for the maintenance and stabilization of peri-implant tissues. In particular, there is still no conclusive answer as to which treatment protocol is more predictable: Immediate implant placement while preserving as much peri-implant tissue or delayed implant placement with the best reconstruction. possible missing hard and soft tissue structures? For the clinician, decision-making is often difficult, particularly given that mastery of several techniques is essential to achieve an aesthetic and predictable long-term result, without forgetting the importance of immediate restoration for tissue maintenance. Precision in the execution of techniques is essential and makes all the difference in the aesthetic area.

This three-day advanced training provides the essential scientific background to make the right decisions for each case for the benefit of your patients. Hands-on training designed with well-supervised practical exercises to master essential techniques for soft tissue manipulation, connective tissue grafting and aesthetic restoration. Live surgery, carefully selected, will help you assimilate the information acquired, allowing you to take your practice to the next level.

## OUR TEAM

**DRS JEAN EL-FATA** DMD, MSC, FRCD(C)  
ORAL & MAXILLO-FACIAL SURGEON

Dr. El-Fata received his dental degree from the University of Montreal. He completed a year of multidisciplinary residency at the Notre Dame Hospital of the CHUM, he then began his specialty in oral and maxillofacial surgery at the Laval University and the Enfant-Jésus Hospital. He also completed a master of science (M.Sc.) program at the Faculty of Medicine of Laval University. He is a Fellow of the prestigious Royal College of Canada in his specialty. He subsequently completed specialized training in implantology at Baylor College of Medicine in Texas. Dr. El-Fata practices in private practice in Quebec city.

**DR. DOMINICO MORIELLI** DDS, BSC  
ORAL & MAXILLO-FACIAL SURGEON

Dr. Morielli received his bachelor's degree in physiology and his doctorate in dentistry from McGill University. He subsequently completed a residency at Saint Mary's Hospital before beginning his specialty in oral and maxillofacial surgery at the Enfant-Jésus Hospital. He completed multiple subspecialty internships in implantology at the Branemark Osseointegration center in Sweden. He taught for more than 15 years at Laval University at the undergraduate and postgraduate levels. In his 30-year surgical career, he participated in the training of several dental surgeons in implant surgery and practiced his specialty in private practice as well as at the Enfant-Jésus Hospital in Quebec.

**DR. SAMER ABI NADER**, BSC DMD MSC  
FRCD(C) PROSTHODONTIST  
GUEST INSTRUCTOR IN COURSE SESSION I-II-IV

Dr. Samer Abi Nader is a dental specialist in Prosthodontics, an associate Professor and associate Dean of Undergraduate Dental Education at the Faculty of Dentistry McGill University. He received a Degree in Physiology from McGill before completing his Dental Degree at the University of Montreal. After a one-year multidisciplinary residency program at the Jewish General Hospital, he completed his training in Prosthodontics at the University of Montreal.

He received multiple awards for his excellence in dental education.

In addition to his academic position, Dr. Abi Nader currently holds also a private practice in downtown Montreal and Moncton.

# A COMPLETE COMPREHENSIVE COURSE COMBINING

- EVIDENCE BASED TECHNIQUES
- HANDS ON WORKSHOP
- LIVE SURGERIES

## TESTIMONIALS

«By far the best implantology course I have taken! Very clear explanations, outstanding supervision. Reliable and reproducible techniques based on scientific literature. I recommend it to everyone. Thank you a thousand times for everything»

**Laurence Bourdeau DMD, Blainville**

«This training is simply on another level from everything I have taken in my 25 years of practicing dentistry and implantology.

The techniques taught are supported by scientific literature and applied clinically with a hindsight of 20 years on all cases shown.

My way of practicing implantology has completely changed, the techniques learned can be applied very quickly. The honest sharing of knowledge, long-term follow-up, practical exercises and live surgeries truly make this training unique.

I highly recommend this course in implantology, beyond all expectations.»

**Marcel Chbat DMD, Ottawa**

«This is the best combined hard and soft tissue implantology course I have taken in my career. Drs El-Fata and Morielli are passionate and true masters of the profession. Comprehensive training, exceptional practical exercises and unparalleled live surgeries.

Training that allows us to take our practice to another level»

**Christopher Dang, DMD, Gatineau**

«Training based on clinically applicable scientific evidence. It is accessible, unpretentious and focused on the well-being of the patient»

**Michèle Boivin DMD, Jonquière**

«Thank you for this excellent, comprehensive and relevant training! The explanations are clear and the clinical applications are immediate, both in implant dentistry, periodontics and prosthodontics!

Drs El Fata and Morielli are extremely generous with their advice and experience»

**Julie Dompierre DMD, Chicoutimi**

«...Very impressed with the content and structure of the course»

**Jacques Goulet Oral & Maxillofacial surgeon, Saint Jérôme**

**EVIDENCE BASED AND  
CLINICALLY RELEVANT**
